Work Experience

Senior Front-End Developer (React.js)

GimmeFY (Teemuno), Remote — Singapore

Mar 2024 – Jan 2026

- Led frontend module development and coordinated task delivery across team members
- Developed and maintained React.js + TypeScript applications used by 5,000+ monthly active users
- Built AI-driven prompt editor and real-time rendering UI reducing manual workflow time by 35%
- Designed 40+ reusable React components, reducing duplicate UI code by 30%
- Implemented Redux Toolkit state architecture across 15+ modules
- Integrated 10+ REST and AI APIs with structured error handling
- Optimized rendering and memoization strategies, reducing re-renders by 40%
- Improved initial page load by 28% using lazy loading and code splitting
- Implemented async queue + retry logic improving AI response success rate to > 95%
- Conducted code reviews and guided junior developers on React patterns and performance practices

Front-End Developer (React.js)

IndiaNIC Infotech Limited — Ahmedabad

Mar 2021 – Feb 2024

- Delivered multiple React.js production applications across client projects
- Handled frontend feature modules and task breakdown within sprint cycles
- Developed reusable component libraries and shared UI systems
- Implemented REST API integrations and dynamic data-driven workflows
- Applied Redux-based state architecture across large applications
- Collaborated with QA, backend, and product teams for release delivery
- Debugged and optimized production React applications

UI Developer

Chapter247 Infotech — Indore

May 2018 – Mar 2021

- Built responsive web interfaces using HTML5, CSS3, JavaScript, and jQuery

- Converted design mockups into reusable frontend components
- Supported React.js migration and early component architecture setup
- Coordinated with backend teams for API-driven UI features
- Optimized UI behavior and cross-browser compatibility

UI Developer

Indianlancer Software Company — Indore

Apr 2017 – Apr 2018

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and jQuery
- Converted UI designs into production-ready web pages
- Implemented API-driven UI interactions
- Debugged and optimized frontend code for performance and stability

Projects

Gimmeify Platform

React.js, TypeScript, Redux, AI APIs

- Developed AI-powered marketing platform frontend
- Built prompt editor, rendering engine, and media management UI
- Managed complex async states and real-time UI updates

Debriefing — React Application

- Developed employee and employer management system UI
- Built reusable and responsive React components

Jobcheck — Next.js Platform

- Built job search platform frontend modules using React/Next.js

CloudHouse — Medical System UI

- Developed responsive doctor task and billing interface

Photobash — Angular Platform

- Implemented Angular-based UI features and enhancements

URstore — eCommerce

- Delivered frontend theme and UI integration
