Portfolio: <https://www.sohail.co.in/>

Professional Summary

Senior Front-End Developer with 7+ years of professional experience, including 4+ years of hands-on experience in React.js development, building scalable, high-performance, production-grade web applications using JavaScript (ES6+) and TypeScript. Strong expertise in component architecture, Redux, Redux Toolkit, REST API integration, AI API integration, frontend performance optimization, and reusable UI systems. Proven experience leading frontend modules, mentoring developers, and collaborating with cross-functional Agile/Scrum teams.

Technical Skills

Front-End Technologies: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Redux Toolkit, React Hooks, Custom Hooks, Context API, React Router, HTML5, CSS3, Webpack, Vite, Babel

API Integration: REST APIs, Third-Party APIs, AI APIs

Tools: Git, GitHub, GitHub Actions, Jira, VS Code, Cursor AI, NPM, Yarn

Concepts: Component Architecture, State Management, Performance Optimization, Reusable UI Systems, CI/CD, Agile, Scrum, Responsive Design

Work Experience

Senior Front-End Developer (React.js)

Gimmeify (Teemuno), Remote - Singapore

Mar 2024 - Present

- Led frontend module development and coordinated task delivery across team members.
- Built an AI-driven prompt editor and real-time rendering UI, reducing manual workflow effort.
- Designed reusable React components, reducing duplicate UI code.
- Integrated REST and AI APIs with structured error handling.
- Optimized rendering performance using memoization and efficient component re-renders.
- Improved initial page load performance using lazy loading and code splitting.
- Conducted code reviews and guided junior developers on React patterns and performance best practices.

Front-End Developer (React.js)

IndiaNIC Infotech Limited - Ahmedabad

Mar 2021 - Feb 2024

- Delivered multiple production-grade React.js applications across client projects.
- Handled frontend feature modules and task breakdown within sprint cycles
- Developed reusable component libraries and shared UI systems
- Implemented REST API integrations and dynamic data-driven workflows
- Applied Redux-based state management architecture across large-scale applications.
- Collaborated with QA, backend, and product teams for release delivery

UI Developer

Chapter247 Infotech - Indore

May 2018 - Mar 2021

- Built responsive web interfaces using HTML5, CSS3, JavaScript, and jQuery
- Converted design mockups into reusable frontend components
- Supported React.js migration and early component architecture setup
- Coordinated with backend teams for API-driven UI features
- Improved UI responsiveness, behavior, and cross-browser compatibility.

Project Experience

Gimmeify Platform

React.js, Next.js, TypeScript, Redux, Micro-Frontend Architecture, AI APIs

- Developed frontend modules for an AI-powered marketing platform using scalable component architecture.
- Architected using a Micro-Frontend approach by building the main dashboard in React.js and implementing the authentication module in Next.js with SSR support.
- Built an advanced prompt editor, custom rendering engine, and media management UI.
- Managed asynchronous workflows, API orchestration, and real-time UI state updates using Redux.
- Optimized frontend performance, component reusability, and scalable application structure.

Debriefing - React Application

React.js, TypeScript, Redux, REST APIs

- Developed an employee and employer management system using React.js with modular and scalable component architecture.
- Built reusable, responsive UI components and implemented dynamic form handling.
- Integrated REST APIs and managed application state using Redux for predictable data flow.
- Implemented client-side routing, protected routes, and role-based UI rendering.
- Optimized rendering performance using memoization and efficient state updates.

Jobcheck - Next.js Platform

Next.js, React.js, JavaScript, REST APIs

- Built frontend modules for a job search platform using React.js and Next.js.
- Developed responsive job listing and search interfaces with reusable UI components.
- Integrated dynamic data workflows and optimized user experience across devices.

CloudHouse - Medical System

HTML5, CSS3, JavaScript, jQuery

- Developed responsive doctor task management and billing interfaces.
- Built user-friendly dashboards for healthcare workflow operations.
- Improved UI responsiveness and cross-browser compatibility.

Photobash - Web Platform

HTML5, CSS3, JavaScript

- Developed responsive UI layouts using HTML5 and CSS3 based on provided design specifications.
- Converted design mockups into pixel-accurate, cross-browser compatible web pages.
- Implemented reusable layout structures and styled UI components for consistency across the platform.
- Optimized CSS structure for maintainability and improved page rendering performance.
- Collaborated with the development team to integrate UI with existing application logic.

URstore - eCommerce

HTML5, CSS3, JavaScript, jQuery, PHP

- Implemented responsive eCommerce UI based on business requirements and design specifications.
- Developed product listing, detail pages, cart, and checkout UI screens integrated with CodeIgniter backend APIs.
- Converted design mockups into pixel-perfect, cross-browser compatible layouts.
- Optimized frontend assets (CSS/JS) to improve page load performance.
- Collaborated with backend teams to ensure seamless UI and API integration.
